Durham residential sales increase in August

DURHAM REGION, September 6, 2017 - Durham Region Association of REALTORS® (DRAR) President Roger Bouma reported 822 residential transactions in August 2017, a 9.75% increase over the previous month.

August also saw a 16.2% increase in the number of new listings in Durham (1,497), compared to the 1,288 new listings reported in August 2016.

“We continue to experience a healthy balanced market,” said Bouma. “The average house price in August in Durham is \$587,172, which is down 16.5% from the highs reached in April, but slightly higher (3%) than the previous month of \$569,748 and an 8.3% increase over the same period last year.

“Home ownership continues to be a good investment,” said Bouma. “It remains the only investment that you can live in, raise your family and make memories, while ensuring a nice return over time.” He added, “Durham Region continues to be a great place to buy, offering some of the best real estate value in the GTA.”

Overview

The Durham MLS® Statistics provided are compiled by the Durham Region Association of REALTORS® and are based on total home sales. The statistics reflect selling prices for various property types within the Durham Region. These statistics are for informational purposes only.

TA	Total Active (at the end of the last day of the month)
YTD	Year to Date (accumulation of new data to date)
PYTD	Previous Year to Date (accumulation of new data to date for previous year)
%+/-	Year Over Year Percentage Differential
Avg. DOM	Average number of days on the market for firm transactions between the first & last days of the month
Avg. SP/LP	Ratio of the average selling price to the average listing price for firm transactions between the first & last days of the month
MOI	Months of Inventory (how long in months it would take to completely sell the average number of active listings). Calculated using a 12 month moving average (active listings/sales)

NOTES

Sales, dollar volume, average sale prices and median prices are based on firm transactions into the MLS® System between the first and last day of the month/period being reported. Average price is calculated by dividing the dollar volume by the number of sales. Median represents the middle number in the ranking of homes sold from lowest to highest price. As of July 2011 Durham Region statistics figures include the municipalities of Uxbridge and Brock. Due to changes to service areas, caution should be exercised when making historical comparisons. Past monthly and Year-to-Date figures are revised on a monthly basis. All statistical information obtained from the Toronto Real Estate Board's Market Watch. Mos. Inv. is Months of Inventory (how long in months it would take to completely sell the average number of active listings). Calculated using a 12 month moving average (active listings/sales).
